DETAILED ACTION

This Application has been examined. The claims 1-7,9-13, 16-17, 19, 21-23 and 25-27 are allowed.

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a video controller for interfacing a frame buffer to a dual scan display having adjacent first and second display portions with a display boundary therebetween, the video controller comprising: a raster engine that receives video data from the frame buffer, formats the video data, and renders the formatted data to the dual scan display line by line, and a hardware cursor that selectively overlays a display portions. The combination of the closest prior art of Prince (US 5,617,113) and Muhich et al. (US 4,706,074) show a similar invention, however, they fail to teach that the hardware cursor comprise a cursor line buffer that overlays a first portion of the cursor image into a first data path of the raster engine according to a comparison of a first vertical counter value with a first cursor start address and a comparison of a horizontal counter value in the raster engine with a cursor column start value and a cursor image width value in the hardware cursor as claims 1, 5, and 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
